DETAILED ACTION

Receipt of the papers filed on December 15, 2005, is acknowledged. In response to the office action of November 28, 2005, applicant elected group I, claims 1-17 without traverse. Claims 1-17 are directed to the patentably distinct species identified below.

Election/Restrictions

This application contains claims directed to the following patentably distinct species: 1) a treatment system which comprises a reactive plasma system and 2) a treatment system which comprises a non-plasma reactive environment system. The species are independent or distinct because a reference teaching a plasma system would not necessarily be relevant to a non-plasma system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 and 13 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 1742

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
